- Performed troubleshooting, monitoring, and basic infrastructure optimizations.

PROJECT

Image Compression Using AWS Lambda *2025*
Tools & Services: AWS Lambda, IAM, S3, Lambda Layers, Python, Shell Scripting

- Built a serverless image compression pipeline using AWS Lambda and S3, automating optimization on upload.
- Used Lambda Layers for managing Python dependencies (e.g., Pillow) and configured secure IAM roles.
- Automated deployment and versioning with shell scripts to streamline function updates.

AWS Web Server with Backup & IAM Access Control *2025*
Tools & Services: Terraform, AWS EC2, VPC, S3, IAM, Shell Scripting

- Deployed a web server architecture using Terraform with custom VPC, EC2 (Apache/Nginx), and secured S3 bucket for backups.
- Implemented IAM roles and users to control EC2 and S3 access with custom policies.
- Automated infrastructure provisioning and output handling using Terraform modules and outputs.

3-Tier WordPress Hosting on Ubuntu 22.04 *2025*
Tools & Technologies: Apache, PHP, MySQL, Ubuntu 22.04, Shell Scripting

- Deployed a 3-tier architecture hosting WordPress on Ubuntu with Apache as the web server and MySQL as the database.
- Installed and configured required PHP extensions, set up MySQL database and user, and secured the environment.
- Managed file permissions and used shell tools for automation and optimized server configuration.
